PROFESSIONAL SUMMARY

AI & Data Science engineering student with hands-on experience in machine learning, NLP, data analysis, and software development. Passionate about building practical AI solutions that transform real-world problems into useful applications using data, code, and AI.

EXPERIENCE

Codec Technology **July 2026 – August 2026**
AI Engineer Intern

Worked on AI/ML tasks involving data processing, model development, experimentation, and implementation of AI-based solutions.

Idel Tech Info **June 2023 – August 2023**
Web Development Intern

Worked on frontend development, website implementation, debugging, and basic software development tasks.

EDUCATION

Nutan Maharashtra Institute of Engineering & Technology **2025 – 2028**
B.E. – Artificial Intelligence & Data Science *Pune, India*

Sandip Polytechnic **2022 – 2025**
Diploma – Computer Engineering | Aggregate: 90.91% *Nashik, India*

New Era English School **2012 – 2022**
SSC – 85.65% *Nashik, India*

PROJECTS

XAI + RAG Based Academic Assistance *Python, RAG, LLMs, NLP, Vector Search, XAI*
Academic Q&A system combining RAG and Explainable AI to provide context-grounded and transparent answers.

Customer Churn Prediction *Python, Pandas, Scikit-learn, Logistic Regression, Streamlit*
Built an end-to-end ML pipeline for churn prediction including preprocessing, feature encoding, model training, evaluation, and deployment.

AeroSense – Drone-Based Air Pollution Monitoring *Kotlin, Android Studio, XML, IoT, Firebase*
Developed a drone-based environmental monitoring system using IoT sensors, Android integration, and Firebase for data management.

AgriConnect – Smart Agriculture Platform *Kotlin, Android Studio, Firebase*
Developed an Android platform connecting farmers and buyers to support direct agricultural product interaction.

AI-Driven LCA for Metallurgy & Mining *Python, Machine Learning, Data Analysis, LCA*
Designed an AI-driven life-cycle assessment approach focused on sustainability, circularity, and environmental impact analysis.

TECHNICAL SKILLS

Programming: Python, Java, C++, C, Kotlin, SQL, JavaScript, HTML, CSS

AI/ML: Scikit-learn, Logistic Regression, Random Forest, Decision Trees, NLP, TF-IDF, RAG, Explainable AI

Data Science: Pandas, NumPy, Matplotlib, Seaborn, EDA, Data Cleaning, Data Visualization

Development: React, Vite, Tailwind CSS, Streamlit, Android Studio, Firebase

Tools & Databases: Git, GitHub, Jupyter Notebook, Google Colab, VS Code, MySQL

ACHIEVEMENTS

- **1st Prize** – Sandip Foundation, Sandip Polytechnic: Project Competition
- **1st Prize** – State Level clg : Poster Presentation
- **1st Prize** – MET Bhujbal, Sandip Polytechnic: Paper Presentation
- **Semi- Finals** – SIH 2025
- **Finalist** – VES Technothon, Project Morpheus, PromptVerse 2.0, NICMAR Pune

CERTIFICATIONS

- Python with Data Science – EduSkills
- AI Tools – be10x
- Mastering JavaScript – Infosys Springboard
- Web Services with Java – Infosys Springboard
